

1. Major: The Student prefers this mode of learning, feels comfortable with it, and uses it for important learning. A student does not necessarily have one and only one preferred style.
2. Minor: The student uses this mode but usually as a second choice or in conjunction with other learning styles.
3. Negligible: The student prefers not to use this if other choices are available. The student does not feel comfortable with this style.

CITE Learning Styles

Visual Language:	I learn well from seeing words in books, on the chalkboard, or in workbooks. I remember and use information if I have read it.
Visual Numerical:	I have to see numbers on the board, in a book, or on paper to work with them. I am more likely to understand math facts if I have seen them.
Auditory Language:	I learn from hearing spoken words. I will be more capable of understanding and remembering information if I hear it.
Auditory Numerical:	I learn from hearing numbers and oral explanation. I may do as well without math books because written materials are not as important. I can probably compute problems in my head.
Tactile-Kinesthetic:	I learn best by experiencing—doing, self-involvement. I definitely need manipulation of material along with accompanying sights and sounds. I seem unable to understand or keep my mind on my work unless I am totally involved.
Social-Individual:	I get more work done alone. I think best and remember more when I learn by myself. I care more for my opinions than for the ideas of others.
Social-Group:	I strive to study in groups and I do not accomplish much individually. Group interaction increases my learning and subsequent fact recognition.
Expressiveness-Oral:	I easily tell you what I know. I speak fluently, comfortably, and precisely. I am not shy about giving reports or talking to the teacher or classmates.
Expressiveness-Written	I write fluently and qualify answers to convey my knowledge. I feel less comfortable perhaps even “stupid”, when giving oral answers. My thoughts are better organized on paper.
